

ME 493: Rubric for Web page assignment			
PSAS Tank team			
	Your Score	Max Score	Comments
YAML Header	5	5	
Project Objective	10	10	
Team	10	10	
Customer/Market Requirements	20	20	It would be good to give an order of magnitude for the "duration of fill cycle and launch". Is it 5 minutes? 5 hours? Does that time interval cause design challenges? Is weight no longer an issue?
Design Challenges	20	20	In the Customer/Market Requirements, two of four bullets are related to stress or mechanical failure. Those aren't design challenges?
Outcomes	20	20	No testing of the entire tank (as opposed to testing to determine PTFE properties)?
Images	12	15	Team photo is 2400 pixels wide by 2319 pixels high. Assignment spec asked for images 1000 pixels wide. Exploded view is 1300 pixels wide. Perspective view would look better if it was scaled down. Some quick tests suggest 280 pixels wide would be a good size.
Total	97	100
